

NARRATIVE:

The purpose of this survey is to establish the East line of that tract of land deeded to Wendell and Carole Ford, recorded on Deed R. 106, Page 446, Umatilla County Deed Records, to see if there are any encroachments or overlaps. The above described parcel was part of a tract of land which also included a parcel deeded to Millon Jahnson, et ux., recorded on R. 32, Page 1069. That larger parcel was surveyed by Kyle in 1960 for KOPAZE.

When the property was split in 1974 and the Easterly portion sold to Johnson, the line between Johnson of Ford was described by bearing only and the lengths of the North line of both parcels were not given as was not the length of the North line of the whole parcel. I decided to retrace Kyle's 1960 survey (the deeds line from said survey) and slake Form said survey. I haved 4 monuments from Kyle's

I decided to retrace Kyle's 1960 survey (the deeds were written from his survey) and stoke ford's East line from said survey. I found 4 monuments from Kyle's survey, including the Northwest corner of Jection 13 which I had referenced Earlier. The bearings of the North and West line of Ford's property are within 0°00'20" of his record bearings and the South line is within 0°00'44". The length of some of the lines are over a foot different from Kyle's but I feel the location of my monuments represent a reasonably accorder retracement.

REGISTERED PROFESSIONAL LAND SURVEYOR
