

NARRATIVE:

The purpose of this survey is to do a boundary line adjustment between lots 2 ; 3, 3 ; 6 and 4 ; 5, Block 1, of "WHITWORTH'S ADDITION" to the City of Echo, to make the deceded lines malch the existing lence lines.

When I did a survey for the City of Echo in 1992 to establish the North line of Block I, of "GULLIFORD'S ADDITION," I could find no monuments in "GULLIFORD'S ADDITION" except ones set by Krunbein in 1979 for the School District. His monuments were so far off of the apparent property lines I did not use them. "WHITWORTH'S ADDITION" is shown on the Plat of "GULLIFORD'S ADDITION" and the lots and blocks in both subdivisions line up with one another. In my 1992 survey for the City I used lence corners in both subdivisions to establish the Morth line of "GULLIFORD'S ADDITION." I found that the lence corners in any of the other Blocks so I did not use them. In this survey I used my North line of Block I, "GULLIFORD'S ADDITION" and the fence corner at the middle of Block 2. "WHITWORTH'S ADDITION" to establish the middle of Block I also using the 2" chain link fence corner for the Casting location. To establish the corners of Block one I used the bearings of the cristing lences and used record distances. As you can see of the map, distances to fence corners in other blocks match reasonably well with the record of the original Plats.
