(NAD 1983 (NSRS 2007))

The history of surveys pertaining to this retracement is as follows:

In 1864, David P. Thompson, U.S. Deputy Surveyor, surveyed the north, east, and west boundaries of the township, as shown on the official plat of survey approved December 25, 1864.

In 1871, Zenas F. Moody, U.S. Deputy Surveyor, surveyed the north boundary and subdivisional lines as shown on the official plat of survey approved November II. 1871.

Also in 1871, Zenas F. Moody, U.S. Deputy Surveyor, subdivided sections 1 through 13 as shown on the official plat of survey approved June 21, 1872.

In 1887, James P. Currin and James E. Nolend, U.S. Deputy Surveyors, surveyed the subdivisional lines and subdivided certain sections by the three mile method, as shown on the official plat of survey opproved June 14, 1890. Currin and Nolend make no mention of any of Noody's corners, and their survey supercedes the dorementioned Moody surveys.

In 1889, James P. Currin, U.S. Deputy Surveyor, retraced a portion of the subdivisional lines and surveyed certain Indian Allotment lines, as shown on the official plot of survey approved August 31, 1889.

In 1890, James P. Currin and James E. Noland, U.S. Deputy Surveyors, performed an examination of corners on certain subdivisional lines, the field notes of which were approved June 4, 1890.

In 1917, L.E. Wilkes, U. S. Surveyor, resurveyed a portion of the west boundary and the E. and W. centerline of section 6 as shown in the official field notes approved November 22, 1917.

In 1917, C.E. Redfield, Surveyor for the U.S. Indian Service, resurveyed a portion of the subdivisional lines and subdivided section 6. The field books of the Redfield survey cre on file at the Bureau of Indian Affoirs, Umalilla Agency Office, in Mission, Oregon.

In 1988-89, Richard L. Johnson, Cadastral Surveyor, resurveyed a portion of the subdivisional lines and subdivision-of-section lines as shown on the official plat of survey approved December 8, 1989.

In 2002-04, Bryan S. Seibold, Cadastral Surveyor, resurreyed a partian of the west baundary subdivision-of-section lines in section 6 as shown an the official plat of survey accepted September 7, 2004.

I, Devid A, Schlaich, Land Surveyer, U. S. Forest Service, HEREBY CERTIFY upon honor, that in pursuance of special instructions bearing the date of the sixteenth day of March, 2007. I have retraced a partient of the subdivision-of-section lines in section 6, Township 2 North, Range 33 East, of the Willomette Meriddin, in the State of Oregon, which is represented upon this plot as having been executed by me and under my direction. Said retracement has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described upon this plot.

David A Sheat January 26, 20 10 Codastral Surveyor

(A) The S I/16 sec. cor. of sec. 6, on the W. bdy. of the Twp., perpetueted by Bryan Seiboid, in 2002, monumented with an iron rad, 5/8 in. diam., firmly set, flush with the ground, with oluminum cap mkd.

\$ 1/16 • \$ 6 2002

from which a new accessory

A power pole, 10 ins. diam., bears N. 22° E., 49.9 ft. dist., with sign mkd. 2.133 E. 06.0200, with 2.1/2 inch x.1/4 inch magnetic nail (Mag Nail), driven at the base on right side center.

Set aluminum U channel post, 6 ft. long, with location poster, 3.0 ft., E., from the iron rod.

From this corner, a metal post, at the NW. corner of a chain link fence extending E. and S., surrounding a cellular wireless telephone tower, bears S. 88°53'57" E. 464.26 ft. dist.

B The SW 1/16 sec. cor. of sec. 6, established by Bryan Seibold, in 2004, monumented with a stainless steel post, 2 1/2 ins. clam., firmly set, top 6 ins. below ground, with bross cop mkd.

SW 1/16 S 6 2004

from which new accessories:

A magnet, in an orange plastic case., buried 24 ins. in the ground, bears S. 23°25'22" E., II.9 ft. dist.

A stainless steel post, 28 ins. long, 2 1/2 ins. diam., set 24 ins. in the ground, for reference monument bears S. 9°05'55' W., 9.25 ft. dist., with brass cap mkd. RN SW/16 S6 N9-05-55E 9.25 FT TO COR 2008, with ond arrow pointing to the corner. Deposit or magnet, in c pink plastic case, at the base of reference monument.

Set aluminum U channel post, 6 ft. long, with location poster, IO.2 ft., S. 9° W., from the stainless steel post.

From this corner, a metal post, at the NE. corner of a chain link fence extending S. and W., surrounding a cellular wireless telephone tower, bears S. 88°45'42" W. 555.64 th dist

The corner is located, 3.0 ft., N., of the SW. edge of a wheat field.

This plot represents the entire survey record of the retracement of a portion of the subdivision-of-section lines in section 6, T. 2 N., R. $33 \ E.$, Willamette Meridian, Oregon.

The survey was performed using a combination of GPS static and Real Time Kinematic measurements. The GPS measurements utilized dual frequency carrier phase receivers and were executed in accordance with the 'Standards and Suidelines for Cadastral Surveys Using Global Positioning System Methods', dated May of 2001, published by the U.S.D.A. Forest Service and U.S.D.B. Bracest Service and U.S.D.B. Servest Service and U.S.D. Servest Service and U.S.D. Servest Service and U.D. Service and U.S.D. Servest Service and U.D. Service Service Service and U.D. Service Service Service and U.D. Service Servic

The geographic position in (NAD 1983 (NSRS2007)) shown hereon, was determined utilizing NSRS CORS stations "PENDLETON" AND "ATHENA"

The lottings and areas are as shown on the plat approved June 14, 1890.

The direction of the lines are based on the true meridian as determined by Global Positioning System (GPS) measurements.

The retracement was executed by David A. Schilach, Lend Surveyor, U. S. Forest Service, beginning September 3, 2008 and completed September 8, 2008, pursuont to Special Instructions deted March 16, 2007, approved March 21, 2007 and Assignment Instructions dated August 6, 2008 under Group Number 23000817, Oregen. He was assisted by Allen Mcdrill, Archaeologist, U. S. Forest Service.

The retracement data shown hereon were thoroughly verified and only the trueline and corner descriptions are given.
